DETAILED ACTION

Claims 1-20 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

The reasons for this rejection are as follows:

1. Reissue claims 1-20 are broader than patent claims 1-20, as light is broader than laser beam
2. From the prosecution record, the applicant clearly argued prior art failed to disclose means for modulating the intensity of a laser beam with the image data of one color as defined in patented claims 1-20. Thus, the applicant has surrendered the

scope of the claim that does not include means for modulating the intensity of a laser beam with the image data of one color. However, the surrendered subject of the means for modulating the intensity of light has crept back into the reissue application.

3. the reissue claims are not materially narrower in other aspects to avoid the recapture rule.
